

Title :

Europe Market for Military Vetronics is growing Steadily due to Modernize Military Vehicles in UK

Description:

Vetronics are the electronics systems integrated in military vehicles for streamlining activities such as communications, navigation, surveillance and vehicle health management among others. The global market for military vetronics is primarily driven by escalating need for real time data to improve battlespace awareness of soldiers and mission specific operational efficiency of the military vehicles. The development of embedded technology is rapidly transforming the military's capabilities for highly network centric operations. In addition, the initiatives undertaken for reduction of size, weight and power consumption (SWaP) of electronics within the military vehicles in order to increase internal space for soldier accommodation and ammunition reserves is also driving the growth of the market for vetronics. Moreover, increasing investments in developing unmanned ground vehicles for military applications are also pushing the market forward. Owing to these factors, the market for military vetronics is growing at a significant pace globally.

Global Military Vetronics Market Report

Following the increasing modernization projects undertaken in countries such as China Japan, India, Israel, Saudi Arabia, UAE, and South Africa boost the demand for military vetronics over the forecast period. This factor is also analyzed to create new opportunities for the vetronics manufacturers globally. Conversely, the market for military vetronics is encountering a major hindrance due to the demilitarization initiatives adopted by countries in North America and Europe. However, the impact of this restraint is analyzed to shrink over the forecast period.

Military Vetronics Market has been segmented based on system, vehicle type and geography.

On the basis of System, the Market has been Categorized into:

- Control and Data Distribution Systems
- Display Systems
- Power Systems
- Vehicle Management Systems

On the basis of Vehicle Type, the Market has been Categorized into:

- Light Protected Vehicles
- Infantry Fighting Vehicles
- Armored Personnel Carriers
- Unmanned Ground Vehicles
- Armored Amphibious Vehicles

On the basis of Geography, the Market has been Categorized into:

- North America
- Europe
- Asia Pacific
- Rest of the World (RoW)

The key participants in the [Global Military Vetronics Market](#) include:

Curtiss-Wright Corporation
Oshkosh Corporation
Ultra Electronics Ltd.
TE Connectivity
SAAB A.B.
Kongsberg Gruppen ASA
General Electric Company
BAE Systems plc
Rheinmetall Defence
Moog, Inc.
Lockheed Martin Corporation
Elbit Systems Ltd.
Thales Group
The Raytheon Company
General Dynamics Corporation

About Us

Transparency Market Research (TMR) is a global market intelligence company, providing global business information reports and services. Our exclusive blend of quantitative forecasting and trends analysis provides forward-looking insight for thousands of decision makers. TMR's experienced team of Analysts, Researchers, and Consultants, use proprietary data sources and various tools and techniques to gather and analyze information.

Our data repository is continuously updated and revised by a team of research experts, so that it always reflects the latest trends and information. With a broad research and analysis capability, Transparency Market Research employs rigorous primary and secondary research techniques in developing distinctive data sets and research material for business reports.
